Kessil Logic

Every tank is different - so we're giving YOU the control. Kessil Logic locks in the ideal spectrum for coral and plant growth, meaning your tank will thrive regardless of the colors you choose.

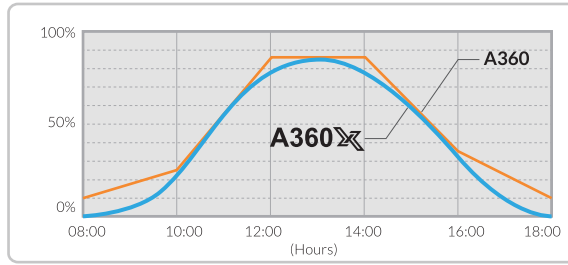

K-Link Communication

Lots of lights? Multiple tanks? No problem. Group, sort, and control up to 32 lights from one WiFi Dongle or Spectral Controller X.

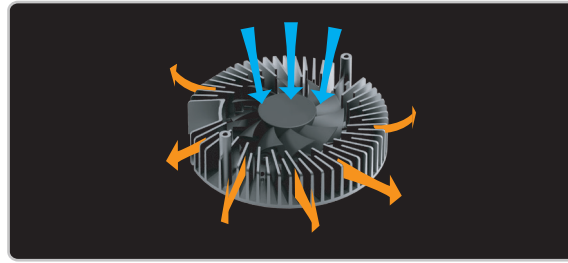

Brighter & Better

Redesigned optics give the A360X 50% greater coverage than its predecessor. Want even more light? The narrow reflector accessory triples center light intensity — why buy two lights when one does the trick?

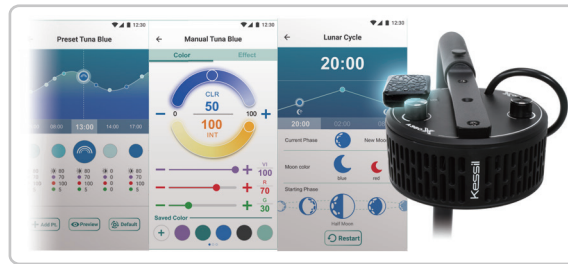

Advanced Dimming

From a gentle sunrise to the faintest moonlight—observe natural day/night cycles and lunar phases with smooth dimming down to 0.1%.

Vortex Fan

There's enough maintenance required on your tank as it is. The A360X's new vortex fan prevents accumulation of dust and debris; reducing the need for cleaning.

XUnleashed

Unleash the capabilities of the A360X with the WiFi Dongle. Use Kessil's new smartphone app to set schedules, choose effects, and customize your color output.
